A comprehensive approach and integrated solution for regulatory compliance, integrity management & operational support

The 360° Framework is a holistic suite of offerings to support the industry's need for asset management, regulatory compliance assurance, risk and integrity management, safety management, and operational process and efficiency improvement.

The CHA Integrated Solutions (CHA) team has been serving the oil and gas industry for more than three decades. This industry is challenged by ever-changing regulations, mounting public scrutiny, an attrition of workforce and experience, all while staying committed to risk, integrity and safety management. CHA has completed thousands of large- and small-scale projects since its founding and has worked with hundreds of operators of crude oil, refined products and other hazardous liquid pipelines, natural gas pipelines, and investor, private, and municipal owned gas utilities. Critical to CHA's growth and success over this timeframe has been the company's ability to evolve, innovate, and ensure both its services and software offerings align and keep pace with the changing needs of the industry, technological advancement, and industry recommended procedures and best practices.

360° Framework

CALL US TO LEARN THE STEPS OF IMPLEMENTING THIS POWERFUL SOLUTION!

We are now able to bring to the industry a group of service and product offerings to support its changing needs. This comprehensive, complete and integrated solutions framework includes expert consulting and advisory services, technical assistance and staff augmentation, regulatory compliant and industry best practice programs and procedures, software solutions and interfacing; data management and record keeping strategies; process improvement and change management guidance, and best-in-class partnerships.

As a technology solutions provider, CHA has long been committed to providing geospatial-based solutions which fully leverage industry data models, regulatory and global industry standards, the Esri technology platform and other best of breed applications. CHA's solutions enable seamless office-to-field-to-office workflows. They are modular and scalable and provide for easy integration with legacy systems. Most importantly, they are easy to implement and even easier to use.
