

Corrivo

Corrivo

Assign, monitor, and manage your compliance, routine O&M operations and other field work...quickly, easily and efficiently!

ELIMINATE PAPERWORK

IMPROVE FIELD ACTIVITIES

STREAMLINE WORKFLOWS

Corrivo helps companies successfully execute surveys, such as leak surveys and aerial patrols, in a defensible and trackable manner. It's proven to improve data quality assurance through error reduction.

Corrivo allows users to manage and assign fieldwork, complete multiple types of field activities (leak surveys, aerial patrols, etc.) and view program performance. From office to field, this solution ensures users can easily schedule surveys plus access, collect, report and map data. Corrivo has a low learning curve and its updated interface makes it simple to use in the office and field. Using an easy to understand map, field crews can capture and record field observations in real-time and then quickly and easily sync to the system of record. In addition, using a simple yet powerful management portal, executives can quickly assess the state of their organization or programs and use the information to make safe, informed decisions with real-time data. If needed, it can be integrated with an existing work management system, as well as your detection equipment, so only one system is used.

This map-based solution is integrated with Esri ArcGIS Enterprise and offers support for IOS devices and the Windows platform. Its ability to support multiple work activities makes this solution extremely flexible. Clients use Corrivo to set up aerial patrol activities to identify possible leaks, construction activity, and areas of erosion. The leak survey activities can be set up to allow field users to log safety issues, area of concerns, and classify leaks. The work manager can easily assign follow up work for an investigation and easily verify the work has been completed.

ADVANTAGES

- > Gain critical insight into field activities and eliminate paperwork.
- > Integrate with existing work management systems and GIS environment
- > Quickly assign and complete a variety of field tasks
- > Work in connected and disconnected modes
- > GPS integration and the use of breadcrumbs
- > Provides analysis of field productivity
- > Attach and annotate photos
- > Interactive mapping
- > Integrated mobile solution
- > Reporting through tabular reports
- > Easily track billable items

IMPROVE SAFETY RATINGS AND DECISIONS BY INCORPORATING CORRIVO INTO YOUR WORKFLOW!

Corrivo

Traceable, verifiable, and complete

Capture the regulatory information needed to protect the organization in case of an event. This solution gives users control to prioritize surveys and report on their process, and it enables support for all field operations, maintenance and 49 CFR Part 192 compliance work. This customizable solution allows for quick assigning and reassigning of crews and the review of data. By eliminating paperwork, users often see data improvements and increased productivity with this automated system. It also reduces overall project costs by ensuring surveys are 100% complete.

Identify trends and devise new management strategies

The management portal is a web-based application that allows an organization's leader to see exactly what is happening inside the organization to make informed and actionable decisions. Executives can proactively view critical metrics, identify trends, and devise new management strategies. Through this, supervisors and executives can see leak survey program statistics, track field personnel, or individual leaks, and monitor day to day activities. The views are fully customizable so that executives can focus on what is important to them.

Eliminate resource constraints

CHA Integrated Solutions (CHA) offers a wide range of services, including spatial analysis and mapping services, GPS field data collection, alignment sheet generation, geospatial database design and implementation, data loading and validation, regulatory consulting, web-based GIS application development, and more. CHA can be an extension of your team so you can get projects completed quickly!

Consistent and high-quality data from the field

Eliminate paperwork and empower field crews to capture data in a way that makes sense to them! All the information is right in front of them on this Esri-based field solution, which makes taking paper into the field obsolete. Field crew performance will improve because work is clearly listed and forms walk them through what information they need to collect. They can sort assignments by date or volume of work and drop pins for leak indications.

Increase your ROI by maximizing your existing systems

With Corrivo, there is one fluid process that integrates with your ERP/EAM, WMIS, MMS, CIS/COS, GIS, and EDMS systems. This solution simplifies the workflow and works with your existing systems, so you get the most out of your investments. It features a seamless two-way interaction between the field and corporate back-office systems of record.
